The 2016 Pot Filler is capable of filling 4000 pots per hour in sizes ranging up to 10" baskets. The automatic potdispenser and pot takeoff arm and conveyor make this a truly automated machine. The soil hopper has a capacity of 2.76 cu. Yds. Changing pot sizes is done with a crank handle adjustment, no additional parts are needed. The unit also comes standard with a drill unit. The Dempic 3 can be used independently or in unison with the 2016. The Dempic is capable of transplanting 3200 plants per hour. Both units are completely mobile.
