The “*slip sheet*” trailer un-loader picks up as many as 60 flats at a time and efficiently places them on the greenhouse floor in seconds. This attachment is designed to easily mount onto any forklift and carries it’s own battery and radio frequency remote controller. Adjustability allows for use with packs and pots in flats. A specially designed light ground pressure forklift, self tracking multi-level trailers and fork attachments for pots are also available to make a complete material handling system.
